SUMMARY

Senior QA Automation Engineer / SDET with 10+ years building scalable, enterprise test automation frameworks and driving AI-powered test automation with agent-based workflows and Claude Code. Focus: Web UI & API automation frameworks from scratch, custom solutions for fast and stable test execution, CI/CD pipeline design, and AI-driven testing workflows.

CORE STRENGTHS

- Deep ownership - quality built end-to-end over a decade at a single Gaming Solutions company.
- Custom Dockerized cross-browser Playwright grid for scalable, parallel web UI test execution.
- Strong Python OOP, async, and performance/load testing.
- Mentoring, code review, test strategy and standards.

TECHNICAL SKILLS

Automation & Frameworks: Playwright, Selenium WebDriver, Selene, Pytest, Behave (BDD), POM
Languages & API: Python 3 (OOP, asyncio), REST, WebSocket, httpx, requests, XPath, CSS, JSON, Postman
CI/CD, DevOps & Tools: Claude Code, Docker, GitLab CI, Jenkins, Allure, Jira, RabbitMQ, Locust, JMeter, AWS

PROFESSIONAL EXPERIENCE

Innovation Group

Senior QA Automation Engineer | Mar 2018 – Present

- Architected UI & API test automation framework from scratch.
- Migrated the entire manual regression suite to automation.
- Modernized the framework with AI agents, integrating Claude Code to generate and maintain tests.
- Mentored 7 engineers transitioning from manual QA to automation; led code reviews and defined test strategy.

QA Engineer | Apr 2016 – Feb 2018

- Ran functional, regression and exploratory testing for gaming web products; authored test cases, managed defects in Jira & TestRail.
- Initiated automation adoption - first Python/Selenium smoke and regression suites.
- Verified cross-browser & responsive UI in close Agile/Scrum collaboration with developers.

SELECTED PROJECTS

Web UI & API Automation Framework - Python framework built from scratch; 2,000+ automated tests.
(Python, Playwright, Behave/BDD)

Dockerized Browser Grid - Custom Playwright grid running Chrome, Firefox & Opera in isolated Docker containers. (Docker, Playwright, WebSocket)

AI-Agent Web Automation - Migrated web UI automation to an agent-teams model, integrating Claude Code to generate and maintain end-to-end tests. (AI Agents, Claude Code, MCP)

EDUCATION

MSc, Information Communication Networks

O.S. Popov Odesa National Academy of Telecommunications | 2005 - 2010
